

IN THE SPECIFICATION

Please amend the specification as follows:

Please amend the paragraph beginning on page 85, line 17 with the following amended paragraph:

From Table 2, it can be seen that the design wavelength and the threshold thickness are in a generally linear relationship and there holds a relationship between the threshold thickness t [nm] and the design wavelength λ [nm] of the distributed Bragg reflector as follows:

$$t=50\lambda \quad t=0.05\lambda-15 \quad (1)$$
